

Entità ISO ed entità HTML gestite da Alml

Alfabeti simbolici	1110
Alfabeti latini	1132
Alfabeti non latini	1139
HTML	1145
Riferimenti	1157

Nel seguito vengono mostrate alcune tabelle e alcuni listati che riportano lo stato attuale della capacità di Alml di rappresentare le entità ISO e le entità HTML standard. A seconda del tipo di composizione utilizzato si può notare la presenza o l'assenza di alcuni simboli.

In questi elenchi sono annotati anche i punti di codifica corrispondenti; tuttavia, è possibile notare che uno stesso punto di codifica può essere associato a entità differenti.

Si osservi che le attribuzioni ai punti di codifica possono essere errate, pertanto potrebbero cambiare in futuro.

È importante osservare che i caratteri riferiti a dei linguaggi non latini, richiedono la selezione del linguaggio stesso, eventualmente anche con l'uso degli elementi '**span**' e '**div**'. Questo dovrebbe chiarire il significato della presenza di due gruppi di alfabeti greci: ISOgrk1 e ISOgrk2 sono riferiti alla lingua greca, mentre ISOgrk3

e ISOgrk4 sono alfabeti simbolici indipendenti dal linguaggio con il quale vengono utilizzati.

In generale, dal momento che l'insieme di caratteri universale non fa queste distinzioni, se il sorgente SGML viene scritto utilizzando codici che possono essere associati a simboli in contesti differenti, viene scelto prima quello che è attribuibile a una lingua. Per esempio, il punto di codifica U+03B1 viene convertito nella lettera greca «α» corrispondente alla macro '&agr;', che però deve essere usata nell'ambito della lingua greca: 'α'. In mancanza di questa accortezza, nella composizione per la stampa si otterrebbe la lettera latina «a», che rappresenta la sua traslitterazione.

Alfabeti simbolici

«

Gli elenchi di questa sezione riguardano gli alfabeti simbolici, che **non dovrebbero** dipendere dal linguaggio utilizzato. Tuttavia, in pratica, simboli come «+», «=», «&» e «@», possono apparire diversi dal solito, quando si usano linguaggi che prevedono un alfabeto non latino.
